

# Fire Performance of Insulated Metal Panels

## KIP 210-20

Learning Credit, AIA 1 LU | HSW

### Fire Performance of Insulated Metal Panels

This presentation will provide a holistic view into the fundamental difference between MCM, ACM and Insulated Metal Panels. The goal is to understand how performance needs based on building types play a key role in selecting the appropriate Insulated Panel system.

We will take a deep dive into fire testing to highlight the different requirements between the FM, ASTM, NFPA, IBC and NBCC/OBC standards.

The last portion of the session will focus on real-world fire case studies highlighting a number different building types from across the globe.
