

Initial Wind Load Estimation Form

Project Information

Contact Name _____	Project Reference _____
Company _____	_____
Phone Number _____	Site Postcode _____
Email Address _____	

Building Information

Length (m) _____	Building length parallel to ridge
Width (m) _____	Building width perpendicular to ridge
Height to Ridge (m) _____	
Height to Eaves (m) _____	
Roof Pitch (°) _____	For barrel vault roofs, please use the eaves pitch
Roof Type _____	Monopitch, Duopitch, Barrel Vault, etc.
Elite Roof Systems _____	

Approx. Roof Area _____	
Elite Wall Systems _____	

Approx. Wall Area _____	

For multiple pitched roofs or complex geometries, please provide plan and elevation views.

Initial Wind Load Calculation Tool is for simple roof and wall designs. This is an initial wind load calculation provided for Elite systems and would ultimately have to be checked by a suitably qualified engineer.

Issue Date: 05/02/2019
