

# Smart Monitoring Product Guide

Award winning  
monitoring solutions  
for liquid energy

# Products that will keep your business growing

Local and remote monitoring solutions optimising liquid assets.

## Specialists in Intelligent Tank Monitoring

The Kingspan group is a dynamic, diverse business, with a global reach. Our comprehensive portfolio of energy storage solutions will meet all your business's Oil, AdBlue®, diesel, and agri storage needs.

As a global leader, we understand your requirements and are driven to design and deliver innovations that exceed your expectations, again and again.

Operating in over 100 countries, we deliver pioneering technology, design and manufacturing, backed by a worldwide distribution network and local experienced sales and customer service team.

Kingspan brings you the confidence of quality and support over the lifetime of your product and beyond.

# The world's most cost effective remote telemetry reporting platform

How Connect Sensor Works:

Scheduled, customised and exportable reports can be used to measure:

We have provided technical, sales and design expertise in telemetry solutions for over 20 years. Our solutions can help you monitor the following areas locally and remotely.

Fuel, Lubricants, Liquids

Materials - Bulk storage

Water

With the rising cost of fuel and inventory, keeping a close eye on these assets is now critical. Smart Monitoring can monitor:

- Home Heating Oil
- Gas Oil & Diesel
- Lubricant Oil
- Liquids / Additives
- AdBlue®
- Waste Oil
- Water
- Liquid Fertilizer
- Chemicals

We can measure almost anything including bulk materials. Using Kingspan Smart Monitoring telemetry can ensure your stocks never run dry. Kingspan Smart Monitoring has experience in providing solutions for the following industries:

- Agriculture
- Industrial
- Food

As well as the following products:

- Additives
- Cement
- Chemicals

Water is a precious resource. Kingspan Water & Energy are experts in sustainable water management and can fit smart monitoring systems to measure water usage and wastewater levels to prevent pollution incidents. Kingspan Smart Monitoring can monitor:

- Cesspits & Sludge tank
- Grease traps
- Separators
- Treatment plants
- Rainwater
- Pump Stations
- Wastewater

# Remote tank monitoring system for business & industry

## Watchman Anywhere Pro

Watchman Anywhere Pro can continually monitor every tank in your business. From diesel to waste oil and a vast range of common liquids, you'll have full transparency about the performance of your tank population. Watchman Anywhere Pro

provides in-depth data that you can view anywhere, anytime. The one piece monitoring unit is easily installed and has a battery life up to 5 years.

- Liquids Compatibility Examples**
- > Home Heating Oil
  - > Gas Oil & Diesel
  - > Lubricant Oil
  - > Liquids/Additives
  - > DEF
  - > Waste Oil
  - > Water
  - > Liquid Fertilizer
  - > Chemicals (non aggressive)
  - > And many more

Data transfer available via PC, cloud, SMS, API, FTP, email or API.

| CHARACTERISTIC           | TRANSMITTER                               |
|--------------------------|---|
| Operating temperature    | -4°F to 122°F                             |
| Environmental Protection | IP68 - Outdoors                           |
| Radio frequency          | 4G NB-IoT/CAT-M1                          |
| Gauge Type               | Ultrasonic                                |
| Ultrasonic range         | Up to 13.1 ft                             |
| Measurement Accuracy     | +/- 0.8inch                               |
| Battery Life             | > 5 Years                                 |
| Certification            | EMC Conformance, ROHS and PTCRB Compliant |
| Warranty                 | 1 Year                                    |

- Sudden Drop Alert (Domestic usage only)
- Liquid Level

Universal receiver for fuel, chemicals, solids and waste oil when you require more than just level measurement.

### Example Applications:

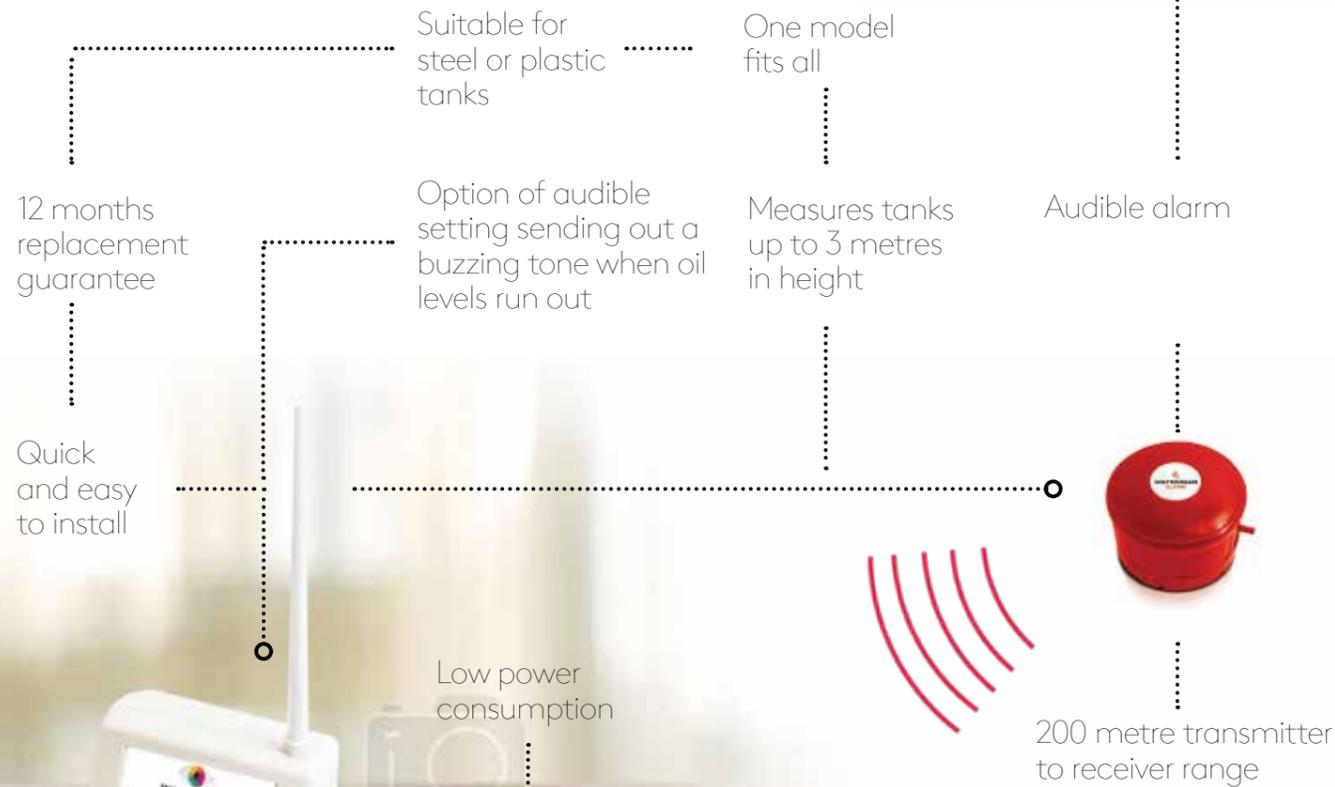

- Drive a klaxon if a waste oil tank reaches acritical level.
- Flash a beacon if a theft or leak has been detected.
- This unit can be connected to an auto dealer.

| CHARACTERISTIC           | TRANSMITTER  |
|--------------------------|--|
| Operating temperature    | 0°C to 40°C  |
| Environmental Protection | Indoor use only  |
| Radio frequency          | 433MHz   |
| Gauge Type               | UltraSonic/Pressure Gauge/ Watchman LT, any 4-20mA sensors |
| Warranty                 | 1 Year   |

The revolutionary electronic measuring gauge which will set off an alarm at the receiver in the house when there is a dramatic drop in oil levels.

### Watchman Sonic Alarm

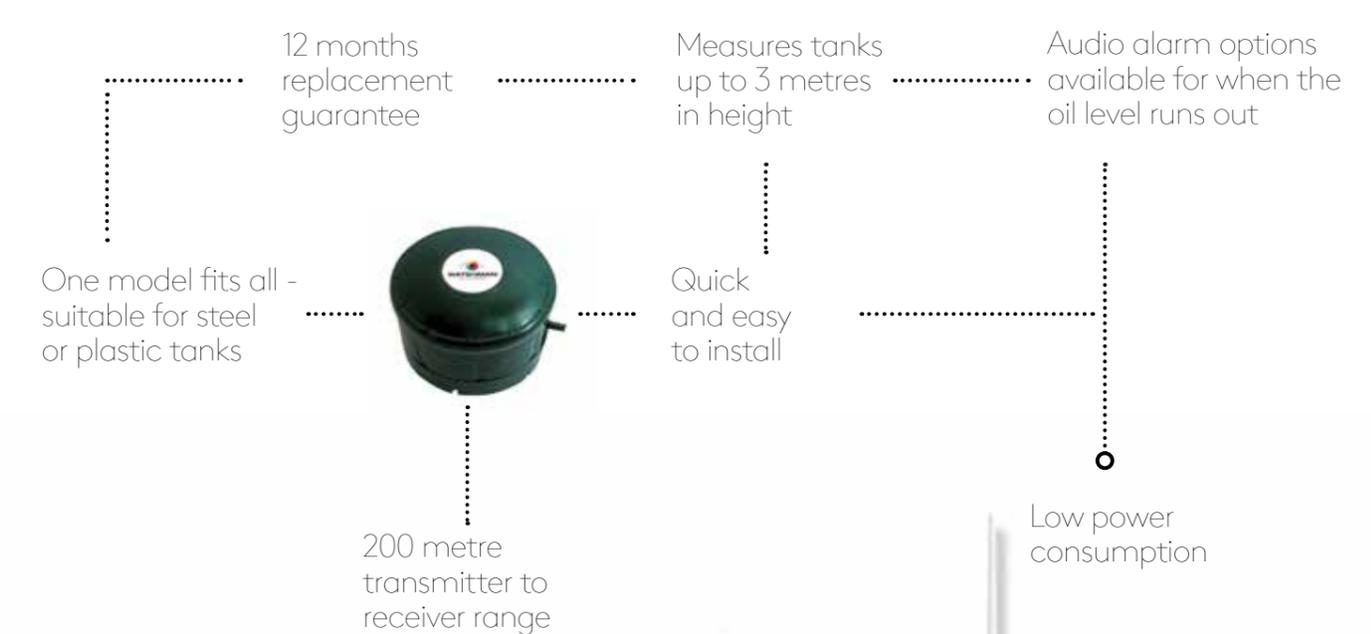

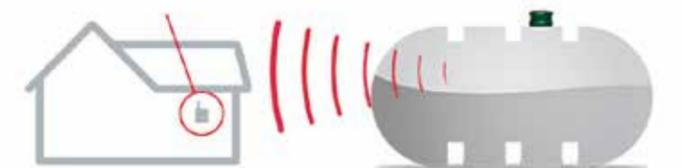

| CHARACTERISTIC           | TRANSMITTER                   |
|--------------------------|-------------------------------|
| Operating temperature    | -10°C to 50°C                 |
| Environmental Protection | RX Indoor use only; TX - IP67 |
| Radio frequency          | 433MHz                        |
| Gauge Type               | Ultrasonic                    |
| Ultrasonic range         | 0,5-3m                        |
| Measurement Accuracy     | +/-2cm                        |
| Warranty                 | 1 Year                        |

Monitor your liquid levels from the comfort of your own home, giving you peace of mind that you won't run out.

### Watchman Sonic

| CHARACTERISTIC           | TRANSMITTER                   |
|--------------------------|-------------------------------|
| Operating temperature    | -10°C to 50°C                 |
| Environmental Protection | RX Indoor use only; TX - IP67 |
| Radio frequency          | 433MHz                        |
| Gauge Type               | Ultrasonic                    |
| Ultrasonic range         | 0,5-3m                        |
| Measurement Accuracy     | +/-2cm                        |
| Warranty                 | 1 Year                        |

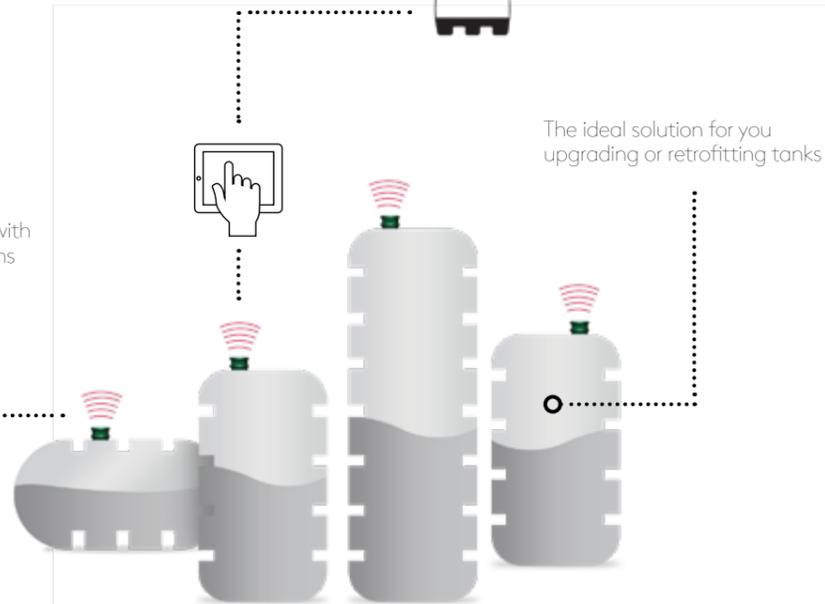

Your bespoke designed solution to monitor up to 18 fuel tanks.

### TMS300 CS Multi-tank

The TMS300 CS Multi-tank has been designed to complement the Watchman Anywhere Pro tank monitoring solution. The device can act as both local and remote monitor giving tank information on site, in a local office via a LAN and remotely using the app and website. The device can monitor up to 18 tanks both wirelessly and using fixed wired sensors.

Scheduled and alert driven information is sent to the Kingspan Smart Monitoring data hosted platform, Connect Sensor. Connect Sensor is capable of hosting real time information from the TMS300 CS Multi-tank as well as the Watchman Anywhere Pro. Tank levels from each TMS300 CS can then be shown on the Connect Sensor platform as well as the Watchman Anywhere Pro APP should be app available on Android and iOS.

Condition monitoring for alarms (e.g. leak, float switch, high level).

Protect your fuel with theft alarm options

Pump cut off applications

| CHARACTERISTIC           | TRANSMITTER   |
|--------------------------|---|
| Operating temperature    | -10°C to 40°C   |
| Environmental Protection | Indoor use only   |
| Radio frequency          | GSM2G/3G; 433MHz(option)                                    |
| Gauge Type               | UltraSonic/Pressure Gauge/ Watchman LT & any 4-20mA sensors |
| Warranty                 | 1 Year  |

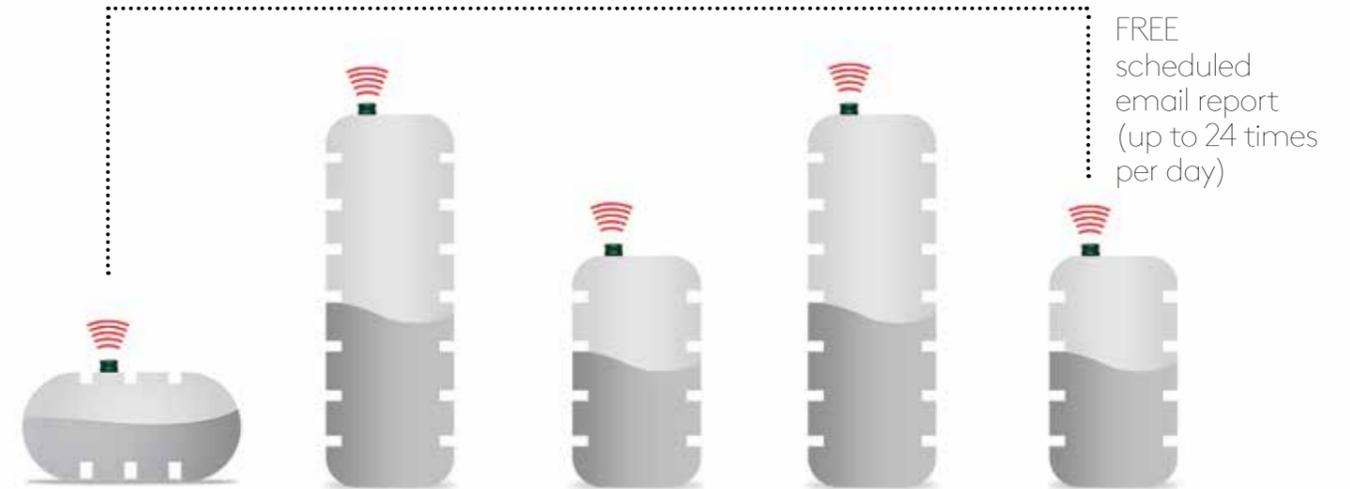

Local monitoring for up to 18 tanks

### Multi-Tank Pro

FREE real time user connectivity via LAN

CE certified

Compatible with various sensors

FREE email alerts for high and low level and alarms

Alerts and alarm locally and remotely

Local alarms + BMS connectivity

| CHARACTERISTIC           | TRANSMITTER   |
|--------------------------|---|
| Operating temperature    | -10°C to 40C  |
| Environmental Protection | Indoor use only   |
| Radio frequency          | 433MHz  |
| Gauge Type               | UltraSonic/Pressure Gauge/ Watchman LT & any 4-20mA sensors |
| Warranty                 | 1 Year  |

# Intelligent fluid and fleet management solution

## Kingspan Access

The Kingspan Access system supports comprehensive fuel management activities supporting business critical decisions. By metering intercompany fuel stations or tanks distributing fuel to fuel to different locations, the system provides complete control over

distributed fuel. The use of proprietary flow meters allows you to install the system on any tank or station or tank used for fuel distribution.

available with  
Kingspan Connect platform

Real time communication between terminals and software.

Connect anywhere anytime - Wi-Fi, Mobile, LAN.

Accurate - level and temperature monitoring.

Safe - identification with unique RFID cards/fobs or pin.

Unlimited - operations, users and vehicles.

The SIM Cards are not designed for use in any safety critical application or environment where failure of the SIM Card could result in the death or injury of any person, including without limitation medical, aeronautic or aerospace, transportation and energy generation or transmission applications or environments (together, "Safety Critical Uses"). The SIM card must not be removed from Kingspan Access and must not be used for any Safety Critical Use or Application.

Current status:  
Level  
Temperature  
Total usage  
Capacity of tank

Current location of the tank

Active graph - level and temperature

Recent activities

Save money - live reports, live level and control.

Personalised reports

Alerts list

Safe - active GPS tracking.

Easy to use - remote control, supervision and push notifications.

Database

Tank User Vehicle RFID cards
